Bug/Weakness description	Fixed?
If the user clicks multiple times on the same button that opens a window, there will be multiple windows open at the same time, one for each click.	No
If the user (logged n as a client) buys a ticket for a cultural event, the ticket is added to his inventory, but the ticket count for that event does not decrease.	No
The search bar from the "View tickets" window, displayed when the user is logged in as a client, doesn't work as intended.	No
If the user (logged in as an organizer) adds an event without selecting the event type, the window closes and there is no error message to notify the user that the operation wasn't completed successfully.	No
If the user resizes the main application window or any other window of the application, the window will look poorly.	No
We have not tested the application on different language/font types of Windows.	No
When an organizer deletes one of his events, for which at least a client bought a ticket, the information on the customer's ticket will be wrong.	No

Observations
It displays no results for almost anything you enter as keyword
The window simply closes as if the operation was successful.
In fact, we have only tested it on Windows 10.
The "Event Name" for the ticket will say "ERROR [event deleted]", the "Date" and "City" fields will be empty and the details depending on the event type (genre, formation name etc.) won't be displayed.
